

## **AMENDMENT TO THE CLAIMS**

This listing of claims will replace all prior versions and listings of claims in this application.

### **Listing of Claims:**

Claims 1-64 (Cancelled)

65. (Previously Presented) A computer-readable storage medium comprising:

operational instructions that, when executed by a processor, cause the processor to receive a first selection generated by a user pressing a first button of a plurality of buttons of a keyboard, the first selection corresponding to a first portion of web information;

operational instructions that, when executed by the processor, cause the processor to display the first portion of the web information that corresponds to the first selection;

operational instructions that, when executed by the processor, cause the processor to receive a second selection generated by the user pressing a second button of the plurality of buttons of the keyboard, the second selection corresponding to a second portion of the web information; and

operational instructions that, when executed by the processor, cause the processor to display the second portion of the web information that corresponds to the second selection.

66. (Previously Presented) The computer-readable storage medium of Claim 65, wherein the plurality of buttons of the keyboard are arranged in a row.

67. (Previously Presented) The computer-readable storage medium of Claim 65 further comprising:

operational instructions that, when executed by the processor, cause the processor to, before the first and second selections are received:

associate the first button with the first portion of the web information; and

associate the second button with the second portion of the web information.

68. (Previously Presented) The computer-readable storage medium of Claim 67, wherein the first button is associated with the first portion of the web information to the exclusion of other web information, and wherein the second button is associated with the second portion of the web information to the exclusion of other web information.

69. (Previously Presented) The computer-readable storage medium of Claim 65, wherein when the first portion of the web information is displayed, it is displayed in a display window irrespective of a relationship between the first portion of the web information and whatever portion of the web information is displayed in the display window when the first selection is received.

70. (Previously Presented) The computer-readable storage medium of Claim 69, wherein when the second portion of the web information is displayed, it is displayed in the display window irrespective of a relationship between the second portion of the web information and whatever portion of the web information is displayed in the display window when the second selection is received.

71. (Previously Presented) The computer-readable storage medium of Claim 65, wherein the computer-readable storage medium includes at least one of RAM and a mass storage device.

72. (Previously Presented) The computer-readable storage medium of Claim 65, wherein the first and second portions of the web information are displayed on a display device.

73. (Previously Presented) A system comprising:

a keyboard that includes a plurality of buttons; and

a computer-readable storage medium comprising:

operational instructions that, when executed by a processor, cause the processor to receive a first selection generated by a user pressing a first button of the plurality of buttons of the keyboard, the first selection corresponding to a first portion of web information;

operational instructions that, when executed by the processor, cause the processor to display the first portion of the web information that corresponds to the first selection;

operational instructions that, when executed by the processor, cause the processor to receive a second selection generated by the user pressing a second button of the plurality of buttons of the keyboard, the second selection corresponding to a second portion of the web information; and

operational instructions that, when executed by the processor, cause the processor to display the second portion of the web information that corresponds to the second selection.

74. (Previously Presented) The system of Claim 73, wherein the plurality of buttons of the keyboard are arranged in a row.

75. (Previously Presented) The system of Claim 73, wherein the computer-readable storage medium further comprises:

operational instructions that, when executed by the processor, cause the processor to, before the first and second selections are received:

associate the first button with the first portion of the web information; and

associate the second button with the second portion of the web information.

76. (Previously Presented) The system of Claim 75, wherein the first button is associated with the first portion of the web information to the exclusion of other web information, and wherein the second button is associated with the second portion of the web information to the exclusion of other web information.

77. (Previously Presented) The system of Claim 73, wherein when the first portion of the web information is displayed, it is displayed in a display window irrespective of a relationship between the first portion of the web information and whatever portion of the web information is displayed in the display window when the first selection is received.

78. (Previously Presented) The system of Claim 77, wherein when the second portion of the web information is displayed, it is displayed in the display window irrespective of a relationship

between the second portion of the web information and whatever portion of the web information is displayed in the display window when the second selection is received.

79. (Previously Presented) The system of Claim 73, wherein the computer-readable storage medium includes at least one of RAM and a mass storage device.

80. (Previously Presented) The system of Claim 73, wherein the first and second portions of the web information are displayed on a display device.

81. (New) The computer-readable storage medium of Claim 65, wherein the first and second buttons operate independently of a scroll functionality.

82. (New) The system of Claim 73, wherein the first and second buttons operate independently of a scroll functionality.

83. (New) The computer-readable storage medium of Claim 65, wherein the first and second portions of the web information are not subsets of a larger scrollable portion of web information.

84. (New) The system of Claim 73, wherein the first and second portions of the web information are not subsets of a larger scrollable portion of web information.

85. (New) The computer-readable storage medium of Claim 65, wherein the first portion of the web information is identified by first data, wherein the second portion of the web information is identified by second data, and wherein the computer-readable storage medium further comprises:

operational instructions that, when executed by the processor, cause the processor to search for the first data in response to receiving the first selection generated by the user pressing the first button; and

operational instructions that, when executed by the processor, cause the processor to search for the second data in response to receiving the second selection generated by the user pressing the second button.

86. (New) The computer-readable storage medium of Claim 85, wherein the first and second data each comprise a respective alphabetic character.

87. (New) The computer-readable storage medium of Claim 86, wherein the first and second data each additionally comprise a respective symbol.

88. (New) The system of Claim 73, wherein the first portion of the web information is identified by first data, wherein the second portion of the web information is identified by second data, and wherein the computer-readable storage medium further comprises:

operational instructions that, when executed by the processor, cause the processor to search for the first data in response to receiving the first selection generated by the user pressing the first button; and

operational instructions that, when executed by the processor, cause the processor to search for the second data in response to receiving the second selection generated by the user pressing the second button.

89. (New) The system of Claim 88, wherein the first and second data each comprise a respective alphabetic character.

90. (New) The system of Claim 89, wherein the first and second data each additionally comprise a respective symbol.

91. (New) The computer-readable storage medium of Claim 69, wherein the plurality of buttons comprise at least three buttons.

92. (New) The computer-readable storage medium of Claim 70, wherein the plurality of buttons comprise at least three buttons.

93. (New) The system of Claim 77, wherein the plurality of buttons comprise at least three buttons.

94. (New) The system of Claim 78, wherein the plurality of buttons comprise at least three buttons.

95. (New) The computer-readable storage medium of Claim 65, wherein the plurality of buttons of the keyboard are arranged in a top row of keys of the keyboard.

96. (New) The system of Claim 73, wherein the plurality of buttons of the keyboard are arranged in a top row of keys of the keyboard.
